

Sense & Sustainability

Deciphering sustainable language, standards, and goals for fabrics

AIA 1 LU / HSW

IDCEC 1 Credit / HSW

This CEU will seek to educate specifiers on how to specify with confidence by demystifying the codes, outlining the proper application for architectural standards, explaining the terminology, and separating the reality from the myths.

Learning Objectives

- Discover polyurethane's journey to sustainability
- Master the language of sustainability standards for buildings and products standards
- Unravel the rules from the myths as they relate to specifying sustainable materials
- Imagine the future of sustainable products based on realistic goals

To arrange a group session for credit, please contact your local Ultrafabrics representative or Michelle Stangarone, Education Associate at education@ultrafabricsinc.com.
