NEXT Generation Green Building: Connecting People & Place
AIA Program Number: TNANEXT17
IDCEC Course Number: CC-103621-XXXX*
USGBC Course Code: 009200011

Course Description:
The green building industry is moving fast. Are you keeping up? This presentation will cover trends that are influencing the green building movement and what that will mean for the NEXT generation of projects. We'll review new tools to help you evaluate material health and the rating systems that are using them. We'll also discuss design strategies to create actively beneficial spaces for learning, working, healing and living. Join us to learn how the NEXT green buildings will connect people and place.

Course Objectives:
- Discuss green building design trends centered on occupants and performance.
- Discuss emerging tools for communication and performance evaluation.
- Review green building system updates and new systems gaining momentum
- Address the necessary balance in relationship between people and the environment.

Organization Credits:
